

TABLE OF CONTENTS

Foreword.....	v
Acknowledgements.....	vi
Canadian Mineral Processors Board Of Directors (2023-2024).....	vii
Innovation For Environmental Sustainability Matawinie Project – Nouveau Monde Graphite	1
Enhancing Niobium Recovery From Drill Core Samples From The Mallard Prospect: A Two-Stage Flotation Approach	2
Online Elemental Analyzer for Spodumene Flotation Control.....	6
Switchable Frother Technology for Improved Cleaner Circuit Performance	8
The Testing of Fenugreek Gum to Suppress MgO at the Eagle Humboldt Mill	13
Review of Cutting-Edge Flotation Devices	20
How to Develop a Scalable Jameson Concentrator from Class 5 – Concept Level Testwork.....	31
Spodumene Flotation: Fundamental to Pilot Scale Investigations.....	41
New Tools to Increase Mill Efficiency During Gold Ore Processing - XRD and Chemometrics.....	42
A Pilot Study into the Use of Hydrated Lime to Mitigate Self-Heating of Sulphide Concentrates.....	43
A Comprehensive Approach to Troubleshooting And Optimizing Cyanide Destruction Unite in the Casa Berardi Gold Mine: A Case Study.....	44
Remote Integration of Autoclave APC at Pueblo Viejo Mine Amidst the Covid-19 Pandemic.....	45
How to Collect Representative Samples, Technical and Cost Impacts.....	56
Low Cost/High Reward Plant Optimization	57
Plant Performance Improvements Using Process Mineralogy.....	67
Risk Management Considerations for Technology Implementation – Conveyed Material Elemental Analyzer Example.....	75
Case Study Review of The Albion Process™ As An Effective Alternative to Pressure Oxidation	83
Neves Corvo Zinc Expansion Project Comminution Circuit Design, Commissioning and Start-Up	94
The Design and Commissioning of a Gold Project.....	106
Successful Installation and Start-Up of Filtered Tailing/Dry Stacking Plant At Agnico Eagle Mines, Laronde Operations.....	119
Synergic Integration of Akasaba Ore In The Goldex Plant	128
The Re-Engineering Of 15 Mile Gold Project for Improved Economics And Environmental Mitigation	129
The Design and Testing of a Vented Centrifugal Froth Pump using a Simulated Mineral Processing Slurry	130
Avoiding Blockages of Gravitational Slurry Flow Through Piping	142
Spodumene Concentrator Design – Lessons Learned.....	152
Electrify Everything – Designing a Fully Electric Gold Processing Facility for A Low-Carbon Grid ...	167
Case Studies of Particle Sorting Production Tests On Copper, Gold and Polyhalite Ore Samples Using Varied Sensors (DE-XRT, Color, SWIR).....	172

The Bond Legacy.....	184
Incorporating Ore Body Mineralogy and Dry Sorting for Efficient Spodumene Processing.....	207
Assessing the Feasibility of Three Stage Crushing and Vertical Stirred Milling as a Complete Comminution Solution.....	208
Energy Transition: Opportunities & Challenges.....	218
