

Table of Contents

I. Uranium

1. Optimization of Solids Removal from Pregnant Aqueous Solution
B. Andrews
2. Optimization of Solvent Extraction for Uranium Recovery and Impurity Rejection
A. Stammitti, P. Bandurski, and S. Faucher*
3. Survey of Solution Mining for Uranium, Potash and Lithium
L. Schwartz and D. Mitchell*
4. Rare Earth, Uranium and Thorium Recovery from Processed Monazite Residue
**B. Zhao, Y. Tang, and J. Zhang*
5. Key Lake RO Plant: 25 Years and Counting
Jack De Klerk, Pho Dai, Kyle Camphaug, Nyle Wasylenchuk, Curtis Paterson*
6. Ventilation System Design for Access and Production Tunnel Development in Uranium Mining
Mhula Kitindi, P.Eng, Euler De Souza, Kirk Lamont
7. Uranium Leaching Rate Accounting: Attributing Root Cause to Uranium Leaching Capabilities
J Strueby
8. Enhancing Yellowcake Dewatering with GEA Decanter Centrifuges for Uranium Processing
Tore Hartmann

II. Potash

1. Unearthing Excellence: Saskatchewan versus Global Potash Deposits
Tabetha Stirrett
2. Beyond Economics: A Deeper Look at the Influence of Minerals
Donna Beneteau and Bruce Downing*

3. The Application of Submerged Combustion in Potash Processing
Wesley Young and David Gutierrez*
4. Getting stuff dry Solid-Liquid Separation with Centrifuges and Dryers in Mineral Applications
Ingo Hiersche

III. Lithium

1. Fatty Acids in Cold Water – The Collaborative Pursuit of Perfection
Daniel Canady and Moe Amassi
2. Recovery of Li and K from Salars in South America
E. Stamatou, M. Machado, and J. Esperjo, P. Carvajal*
3. Refining Lithium Hydroxide at Pilot Scale
Rebecca Lee, Jack Zhang, and Brian Guo
4. Influence of Grinding Media and Chemical Pretreatment on Spodumene Flotation
Philipa A. Opoku, Boris Albijanic, Aleksandar N. Nikoloski, and Bogale Tadesse*
5. Advanced Refining Methods for Lithium Production: A Comprehensive Process Approach Using GEA Technologies
Tore Hartmann
6. Development of Australian Hard Rock Lithium Projects
Damian Connelly
